**For Our Affiliates****Contact Us****Lee Hetherington**

Lee Hetherington arrived at MIT in 1984 and received his S.B. and S.M. degrees from the Department of Electrical Engineering and Computer Science in 1989, at which time he joined the Spoken Language Systems group. In 1994, after completing his Ph.D. thesis, *A Characterization of the the Problem of New, Out-of-Vocabulary Words in Continuous-Speech Recognition and Understanding*, he joined the research staff. His research interests include many aspects of speech recognition, including search techniques, acoustic measurement discovery, and recently the use of weighted finite-state transduction for context-dependent phonetic models, phonological rules, lexicons, and language models in an integrated search.
